I don't know if the report was ever posted. This goes back a few years, but did R5 ever plan to post the report, or simply give the data and a summary/report to Ohio EPA? I thought Ohio was concerned with how the information would be conveyed to the public, so we left it with them to handle; but maybe I'm not remembering the details correctly.

I have a couple of files for Apex, but I don't know if they are the final versions (the one I have still has a minor reminder/comment from you in it, so I suspect I don't even have the final). The "poor quality copy" scan didn't make it through the forwards to me so I can't compare it to what I have.

Do you know if they ever posted the Ohio Landfills report online or where the decent looking final pdf is?

Rebecca,

Please see the email below. Do you know if this report was ever posted online? I could not immediately find it.

Maybe we can post it online if that hasn't been done yet? I am cc'ing the web team.

Thanks.

EPA Region 5 Media Relations...

Joshua:

Hello, I work with Ohio EPA's Southeast District Office in Logan, Ohio.

I'm looking to see if a 2014 US EPA report is available online, so we may reference the report in a public "response to comment." I haven't been able to find a copy online myself.

I have attached here a poor quality copy of the report.

The report is titled: "Summary of Geospatial Measurements of Air Pollution (GMAP) – Hydrogen Sulfide and Methane for Apex and sunny Farm Landfills."

Back in 2014, US EPA Region 5's Air Toxics and Assessment Branch performed geospatial measurements of air pollution (GMAP) around both Apex and Sunny Farm Landfills and eventually generated a report.

Please provide me with an online link to this report, so the link may be shared with the public.

Thanks,

Craig
